

Wir, die ZT-21/1 (3. Ausbildungsjahr Zahntechnik) haben vom 26.02. bis 28.02.2024 einen Ausflug zur Bildungsstätte unserer Berufsgenossenschaft am Linowsee nahe Rheinsberg gemacht. Dabei wurde die Klasse in zwei Gruppen geteilt: die eine Gruppe hat am Fahrsicherheitstraining teilgenommen und die andere wurde im Arbeits- & Gesundheitsschutz geschult.

Gruppe 2: Arbeits- & Gesundheitsschutz - Davon können wir auch auf Englisch berichten :-)

Our expectations were limited to learning about health and safety and gaining experience. Of course, we also wanted to explore the Linowsee training centre and see if the highly praised food was really as good as we had been told. There were a total of five breaks of at least 30 minutes each, during which we were provided with different types of food. So we didn't go home hungry. Daniela Kurth made the course creative and varied. Some of the key points we have learned were that we are not responsible for others and theoretically/legally we are not even responsible for ourselves. We also learned a lot about labour law and topics such as noise pollution, prevention of occupational diseases, etc.

After the seminars, which ended at 17:30 h, we had to organise our own free time. On two evenings we enjoyed a night walk and an archery activity. Both were very well organised and enjoyable. The centre also offered a variety of other activities such as bowling, table tennis, a gym, and a pub. The pub had very reasonable prices and we had a lot of choice. The rooms were well prepared. They were very clean and everyone had a single room, which was very good.

Daniela Kurth encouraged to take care of ourselves lest we suffer from occupational illness in the future. We are enthusiastic about health and safety at work and want to pass on our knowledge to the next generation!
